Experience

qikfox (Methodworks Pvt. Ltd. — India payroll) July 2024 – Present

Software Development Engineer *C, Rust, JavaScript, Chromium, Android, tree-sitter*

- Owned Android releases: rebased on upstream Chromium for desktop parity, and shipped 5+ major versions.
- Ran each release cycle to completion, from build to rollout, across every major version.
- Fixed stability issues and regressions before every release, debugging crashes to resolution.
- Gated features per Android version so behaviour stayed correct across the OS range in the field.
- Codebase-analysis product: tree-sitter parsing, deterministic grouping, and a team knowledge graph.
- Remote compute instances on E2B, provisioned per account and isolated per owner.
- Ownership and invite flows, so teams could share analysis without leaking each other's code.
- Billing and a wallet ledger built from the ground up.
- Audit rails on every action and payment, so usage and spend stayed traceable.
- Agent collaboration: several AI agents working the same codebase together.
- Led 4-person teams across workstreams, setting deliverables through to live production.

qikfox (Methodworks Pvt. Ltd. — India payroll) July 2023 – July 2024

Associate Software Developer Engineer *Golang, Python, Linux, MCP, AI Agents*

- Turned a Linux OS into a native AI conversational interface: an MCP server over stdio with an Electron chat client as the front-end.
- Agentic tool calls for commands, applications and files, routed through audited MCP calls, not raw shell access.
- Guardrails against prompt injection: input/output validation, deny-listed calls, and confirmation before irreversible actions.
- Local and remote model backends, packaged as a Debian ISO for deployment.

Kartexa May 2023 – July 2023

Frontend Developer Internship *React.js, TailwindCSS, Node.js*

- Developed reusable, responsive components with React.js and TailwindCSS.
- Collaborated with backend to ensure smooth integration and optimized API usage.

Projects

AICommit

Next.js 15, TypeScript, React, Shadcn UI, Tailwind, Stripe, Google Gemini AI, LangChain, RAG

- Built an AI codebase-intelligence platform: commit messages, RAG-powered answers, and meeting intelligence.
- Added a RAG pipeline and LangChain over repository context, powering retrieval-backed Q&A on the codebase.
- Integrated AssemblyAI to transcribe meeting uploads, then extract summaries, key decisions, and action items.
- Turned those action items into GitHub issues automatically, so meeting decisions became tracked work.
- Added a rate limiter (queue + retries) for the Gemini and GitHub APIs to prevent dropped requests.
- Integrated Stripe for payments, alongside an interactive UI built with Shadcn and Tailwind CSS.

Education

JSS Academy of Technical Education, Noida Nov 2021 – June 2023
Master of Computer Applications ***CGPA: 8.5/10***

Gurukula Kangri (Deemed to be University) Aug 2018 – July 2021
Bachelor of Science in Computer Science ***CGPA: 8.7/10***

Skills

Languages: JavaScript, TypeScript, Golang, Rust, Python, C
AI & Agents: Agentic AI, MCP, FastMCP, LangChain, RAG, prompt-injection guardrails, Gemini, E2B
Technologies: React.js, Next.js, Tailwind CSS, Node.js, Prisma, MongoDB, Electron, tree-sitter, Chromium, Android
Tools: Linux, Docker, Git, GitHub, Jira, VS Code, Stripe, AssemblyAI
